Segment Pen Portraits

#### **European Multilateralists - Who Are They?**

Individuals in European Multilateralists skew towards an urban, affluent profile, are marginally older than average, and hold a broadly centrist political outlook.

## European Multilateralists - Socio Cultural Profile

Compared to all other segments, individuals in European Multilateralists are significantly more likely to view themselves as European citizens, although their own country is also a key determinant of their own individual identity. This segment is strongly of the view that the evolution of Ireland to a more diverse society in recent years has been a lot more positive than negative.

		Empathy	27	26	Weak institutions ir	those countries	20 22	Governance	26 <b>27</b>	
Overseas aid organisations	4.8 5.20	Morality	23	27 High	h debt burden for dev	eloping countries	14 19	Economic Growth	24 23	
								Women's Equality	15 18	

The vast majority of those in European Multilateralists are concerned about poverty in developing countries and are more inclined than the average individual to support aid to developing countries due to a sense of justice and morality. Attributing poverty in developing countries to a mix of causes, these individuals indicate high levels of trust in multi-lateral organisations like the EU and UN, compared to other relevant bodies.

#### European Multilateralists - How do we target them?

European Multilateralists is best targeted through the full mix of standard media touchpoints. These individuals are more likely than average to place faith in global organisations to bring about social change, and less convinced of the ability of local groups and individual citizens to do so.

# Thank you.
